PROFILE

Senior software engineer building .NET backend systems since 2018. Owned delivery of two production-platform replacements at Okala, with experience in Kafka-based systems, reliability and technical mentoring. M.Sc. in Artificial Intelligence with published reinforcement-learning research.

CORE SKILLS

C# · .NET / ASP.NET Core · SQL Server · Entity Framework Core · Apache Kafka · Redis · Distributed systems · Docker / Kubernetes · Integration testing

EXPERIENCE

Senior Software Engineer - Okala

Tehran, Iran · Oct 2024 - Present

Online grocery business in Golrang Industrial Group, handling 150K+ orders daily and over 300K during campaigns. Focus: delivery operations.

- Owned delivery of a replacement delivery platform: built the replacement, migrated operational workflows and retired the legacy system.
- Built four independently deployable .NET services with the team, with approximately 200 versioned REST endpoints and four concurrent store API versions. Led the migration from .NET 8 to .NET 10.
- Led a 40-topic Kafka backbone with at-least-once delivery and per-entity ordering; added retry and outbox handling and Redis-based notification deduplication.
- Replaced manual store delivery-radius configuration with AutoRadius, a rules engine using time, weather and order backlog. Built geospatial coverage and nearby-store search with SQL Server and NetTopologySuite.
- Built integration tests with real SQL Server and Redis containers and two ASP.NET Core hosts; parallelised execution in GitLab CI. Worked with the team on metrics and distributed tracing.
- Defined engineering standards and mentored junior and mid-level engineers through code reviews, design discussions and technical problem-solving.

Software Engineer - Okala

Tehran, Iran · Feb 2022 - Sep 2024 · Promoted to Senior Software Engineer

- Built a replacement fulfillment platform, migrated operational workflows and retired its predecessor during the move away from the monolith.
- Led the migration from Windows Server to containerised services on Kubernetes. Following the migration, production incidents became rare, down from almost daily.
- Developed and supported backend services across fulfillment, delivery and logistics, including SQL Server schema changes, production on-call and delivery through GitLab CI.

Backend Engineer

Capital-markets software company · Tehran, Iran · Oct 2018 - Feb 2022

- Built C#/ASP.NET services for a stakeholder conferencing platform launched during COVID-19 to replace in-person capital-markets meetings, using RabbitMQ, SQL Server and Redis.
- Developed automated reporting and real-time dashboards for internal operations.

TECHNICAL SKILLS

- **Backend and data:** C#, .NET 6-10, ASP.NET Core, Entity Framework Core, LINQ, SQL Server, T-SQL, Redis, NetTopologySuite
- **Architecture and messaging:** Domain-Driven Design, Clean Architecture, event-driven systems, microservices, REST APIs, Kafka, RabbitMQ, transactional outbox
- **Delivery and testing:** Docker, Kubernetes, GitLab CI/CD, Git, xUnit, Testcontainers, Moq, BDD (Gherkin/Reqnroll)
- **Observability:** Prometheus, Elastic APM, Serilog, Elasticsearch

EDUCATION & RESEARCH

M.Sc. in Artificial Intelligence

Shahid Beheshti University · 2016 - 2019

Multi-Agent Systems Lab: transfer learning for reinforcement learning, applied to traffic-signal control.

B.Sc. in Software Engineering

Shahrood University of Technology · 2012 - 2016

PUBLICATION

Norouzi, M., Abdoos, M. & Bazzan, A. L. C. "Experience classification for transfer learning in traffic signal control." *The Journal of Supercomputing*, 77, 780-795 (2021; online 2020). [Read publication.](#)
